GOODS AND SERVICES INFORMATION

For Educational services, namely, conducting conferences, seminars, and workshops in the field of energy sources and wind power applications, automotive, off-highway, defence, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems; providing training in connection with energy projects, namely, wind power projects and projects in connection with other renewable energy sources; providing safety courses; educational services, namely, conducting conferences, seminars, and workshops in the field computer software, namely, technical computer software used as an aid in the design, engineering, manufacture and testing of machines and equipment and of their components and for monitoring the condition of the aforesaid machines, equipment and components; educational services, namely, conducting conferences, seminars, and workshops in the use and application of computer software or computer programs for providing control systems for controlling mechanical and electrical power systems for power transmission; providing on-line electronic publications not downloadable guidebooks, leaflets, manuals and texts in the field of energy sources and wind power applications, automotive, off-highway, defence, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems; publication of texts, books, journals, electronic books, pamphlets, manuals including instruction manuals on-line; providing training programmes in the field of energy sources and wind power applications, automotive, off-highway, defence, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems, training manuals distributed therewith; arranging, organising and conducting conferences, seminars, and workshops in the field of energy sources and wind power

applications, automotive, off-highway, defence, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems

International Classes 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Business management of energy projects, namely, wind power projects and projects in connection with other renewable energy sources and business advisory and consultancy services on the operation of wind farm businesses; business management of wind power systems during their operating life; collection and processing of data onto computer databases in connection with wind power systems, namely, compilation of statistics relating to operation and production of the systems; collection and processing of data onto computer databases in connection with automotive, off-highway, defense, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems, collection and processing of data and statistics derived from computer software or computer programs for providing control systems for controlling mechanical and electrical power systems for power transmission; business information, advisory and consultancy services relating to the aforesaid

International Classes 35 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Advertising and Business

For Installation, servicing, maintenance, reconditioning and repair of wind power systems, namely, wind turbines and wind power plants as well as parts and fittings for wind turbines and wind power plants; consultancy in connection with, installation, servicing, maintenance and repair of wind power systems, including windmills and wind power plants as well as parts and fittings therefore; machinery installation, maintenance and repair; installation, maintenance and repair of transmission and mechanical parts, namely, drive trains; installation, maintenance, refurbishment and repair of automotive, off-highway, defense, marine, aerospace and rail and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems; information, advisory and consultancy services in the field of installation, servicing, maintenance, reconditioning and repair of wind power systems; installation, maintenance and repair of computer hardware and computer peripherals

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For Computer hardware; tablet computers, notebook computers, laptop computers, and computer terminals; computer peripheral devices, central processing units processors, computer memories, computer monitors, disk drives for computers, and computer keyboards; blank floppy discs, and read-only memory compact disks; computer network server; technical computer software used as an aid in the design, engineering, manufacture and testing of machines and equipment and of their components; computer software and computer programs for use in computer aided design, engineering, manufacture, and testing of machines and equipment with rotating parts and their components, including gear-boxes, shafts, bearings, drive lines, drive trains and transmissions, electrical power systems and electrical power generators; computer software and computer programs for operating control systems and controlling mechanical and electrical power systems for power transmission; computer software and computer programs for use in designing rotating machines, electrical rotating machines, mechanical rotating machines, electromechanical rotating machines, and/or hydraulic rotating machines and their components; computer software diagnostic platforms for the management and assessment of faults and conditions

within wind power plants and wind-operated machines, within automotive, off-highway, defense, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems and gearless turbines; electronic control apparatus and equipment consisting of drivetrains and gearboxes and computer equipment consisting for operating wind turbines, wind power plants, and other wind operated machines; control and monitoring equipment consisting of vibration monitoring hardware, oil particle counters and sensors, condition monitoring sensors, including sensors for: vibration analysis, acoustic monitoring, oil quality analysis, temperature monitoring and electrical generator monitoring for wind turbines, wind power plants, and other wind-operated machines; sensors and optical sensors for installation of wind turbines, wind power plants, and other wind-operated machines for sensing vibration, power, current, voltage, oil particle counter, oil quality, temperature, pressure and strain gauge; parts for all the aforesaid goods; downloadable electronic publications in the nature of magazines and newsletters relating to automotive, transmission, bearings, energy sources and wind power applications

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Computer consultancy services; computer programming services; computer programming and software development for others; design and development of computer software or computer programs for providing control systems for controlling mechanical and electrical power systems for power transmission; rental of computer software and hardware; rental of computer software and computer hardware for wind farm operations and maintenance; computer engineering services; engineering services; technology consultation and research services in the field of energy sources and wind power applications, automotive, off-highway, defence, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems; computer design and engineering design services technical consultation and research in the field of transmission design; installation, configuration and maintenance of computer software; installation, servicing, repair and maintenance of computer software and computer programs for providing control systems for controlling mechanical and electrical power systems for power transmission; project assessment and development services, namely, assessing the need for process improvements, improvements to concept and design stages in product development, the need for software support and software upgrades for clients as to their requirements relating to the design of mechanical and electrical power systems for power transmissions and within wind power applications, and to the control systems for controlling mechanical and electrical power systems for power transmissions and within wind power applications in the area of computer software and computer software application; technical assistance concerning design, research and development of wind turbine and wind power projects and effecting such projects; development and testing of wind turbines, wind power plants, windoperated machines, and components of others for the purpose of safety and certification; development and testing of automotive, off-highway, defense, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems of others for the purpose of safety and certification; providing technical research projects concerning wind turbines, wind power plants and other wind-operated machines, automotive, off-highway, defense, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems; design of manufacturing methods in the field of energy sources and wind power applications, automotive, off-highway, defence, marine, aerospace and rail applications and industrial machinery in which

mechanical power is transmitted through rotating shafts, gears and bearing system; computer aided design for manufacturing operations; consultancy and advisory services relating to all of the above; technical support services, namely, troubleshooting of energy sources and wind power applications, automotive, off-highway, defense, marine, aerospace and rail applications and industrial machinery in which mechanical power is transmitted through rotating shafts, gears and bearing systems

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the wording "Netcom Lab" in the following design: The letters "NET" read horizontally in large, uppercase, sharp, block green lettering with each letter having four sharp, grey, horizontal lines coming across from the bottom of each letter up to 1/4th of the height of each letter for effect. The letters "com" next to the letter "T", read horizontally in smaller, lowercase, less bulky grey block lettering with the letter "m" having the design and appearance of being connected to the letter "o" and therefore the letter "m" appears to be missing the letter's first and left-most vertical line. The letters "LAB" next to the letter "m" are flipped so as to read going up vertically up to the height of the letter "m" in small, grey uppercase block lettering. All the lettering is shaded with an adjoining black background and appears on a white background. **Color Drawing** Yes **Color Claimed** The color(s) green, grey, black and white is/are claimed as a feature of the mark.
