

# Apple Trade-In Program for Education

Trade in used equipment from any manufacturer and apply value to new products.

Sometimes, to make room for new equipment, you need to dispose of existing systems and then find the funds to pay for new purchases from an ever-tightening budget.

With Apple's Trade-In Program for Education,\* Apple will not only help you remove old products, but will also help you recover any remaining value to help offset the cost of a new purchase. Apple, in conjunction with its third-party vendor, also removes data and provides a disposition report for each system with residual value to facilitate your asset management.

## Our Promise

- We maintain your privacy.
- We make technology disposal easy for you.
- We guard against harmful working conditions.
- We protect the environment by recycling components and materials.
- We don't sidestep these responsibilities by exporting materials to another country.

## Benefits

- Leveraging Apple's Trade-In Program allows you to recover value from your existing equipment. It also ensures that your retired equipment will be disposed of in the most environmentally sound manner.
- All recycled hard drives are ground into confetti-size pieces.
- Data on all hard drives to be resold is overwritten three times and sanitized.
- Customers receive a certificate of destruction for each lot recycled through the program.
- All asset tags and other identifying information are removed prior to disposition.
- No waste from Apple's U.S. recycling program is shipped outside North America.
- Equipment in good working order can be traded in for credit toward Apple equipment or for a check.

Call 1-800-800-2775 to talk to an Apple education representative about how to get more purchasing power using Apple's Trade-in Program for Education.

\*You are responsible for ensuring that the disposition of your equipment through Apple's Trade-In Program for Education is consistent with all applicable federal, state, and local laws and regulations.
